Idea for the logo

- It raises the (a) question, the answer has to be given (by us)
- The hexagon equals a window to be opened
- The two variants might be used by purpose: the "logo" as explanation and the icon as insider
- The suggested function is stupid, but could be a gimmick:
  - o is.ssL(ARchaeology)
    TRUE
    FALSE
- set LAR in upper case
  - o Language = dialogue, information, knowledge
  - o Archaeology = our topic
  - o R = our or a good or the dominant :-) framework

The grafik has to developed a bit more…
